

# About background

1. Employment: Development Agency Sora, LAG Loka Mountains office.
2. 512 km<sup>2</sup>, 42.969 inhabitants, 4 municipalities.
3. Škofja Loka area was also the case study area of the project.
4. **Resilience of LAG** is associated with economic development in connection with social perspective (this was strongly present after Slovenian independence after 1991) and environmental issues (floods, landslides, wind).
5. The local community and governance made important steps to become more resilient on economic and social challenges, but still not enough on environmental issues in connection of extreme weather events.

# Course added value

1. Building on the theoretical background.
2. Practical examples and experiences of the resilience of rural communities.
3. Weekly on-line meetings of all participants and the project team.
4. Exchange of opinions, experiences and examples of good and bad practices
5. Co-organisation and hosting of the project team meeting in Škofja Loka.
